## genius in the bedroom.

This is not your grandparent's adjustable bed. But it is the hottest bed - adjustable or not - on the market. The first bed to break through ordinary technology, Prodigy™ delivers features that consumers really want. Isn't it time to excite your customers and give them something to go home and talk about?

### **Prodigy is the only bed that offers:**

- iPhone® and iPod Touch® application which offer integration of additional electronics in the bedroom.
- Snore feature gives users the power to alleviate disturbing snores by repositioning their sleeping partner.
- Two-way Wi-Fi remote control with LED screen and clock.
- Sleep timer allows user to gently transition from activity position to sleep position at specified times.
- Gentle wake alarm uses light massage to awaken the user. Paired with an audio alarm.
- Remote locator feature helps find a missing remote control.
- Whisper Quiet motor allowing 600 lbs lifting capacity.

**Be one of the first to offer Prodigy...  
pre-orders will be taken through May 2009.**
